2. Click the Allow Access button when the Security Warning window appears

02. Run Wallet Program & Mining

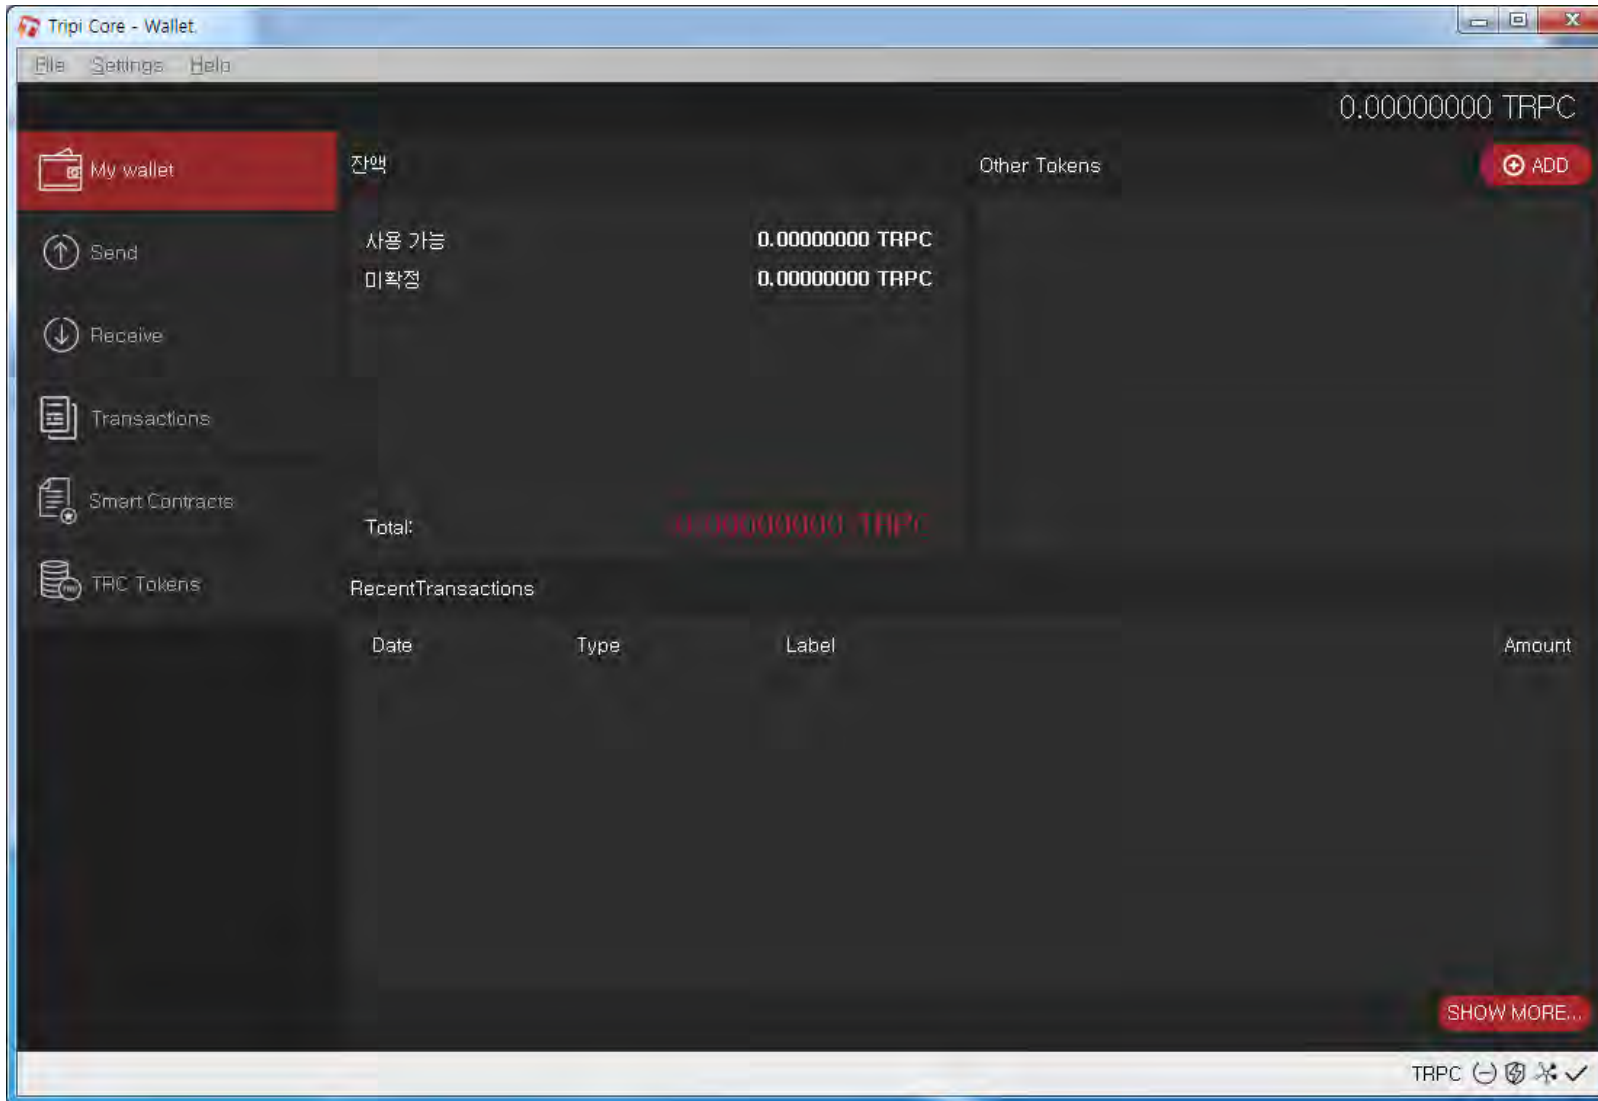

3. When the wallet is run, the block syncs automatically.

* If you see an icon at the bottom of your wallet, such as the image below, you are connected to the node.

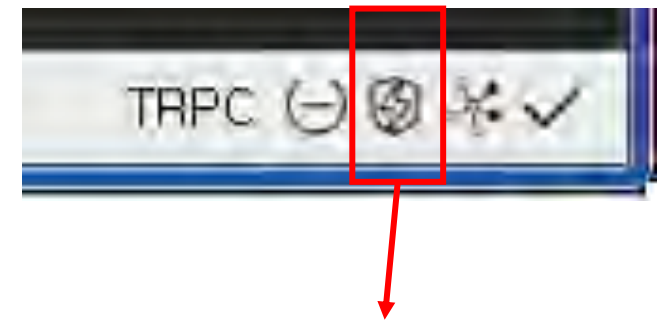

Confirm Node Connection

02. Run Wallet Program & Mining

* This means that if the icon below is illuminated in black at the bottom of the wallet, it is normally mined.

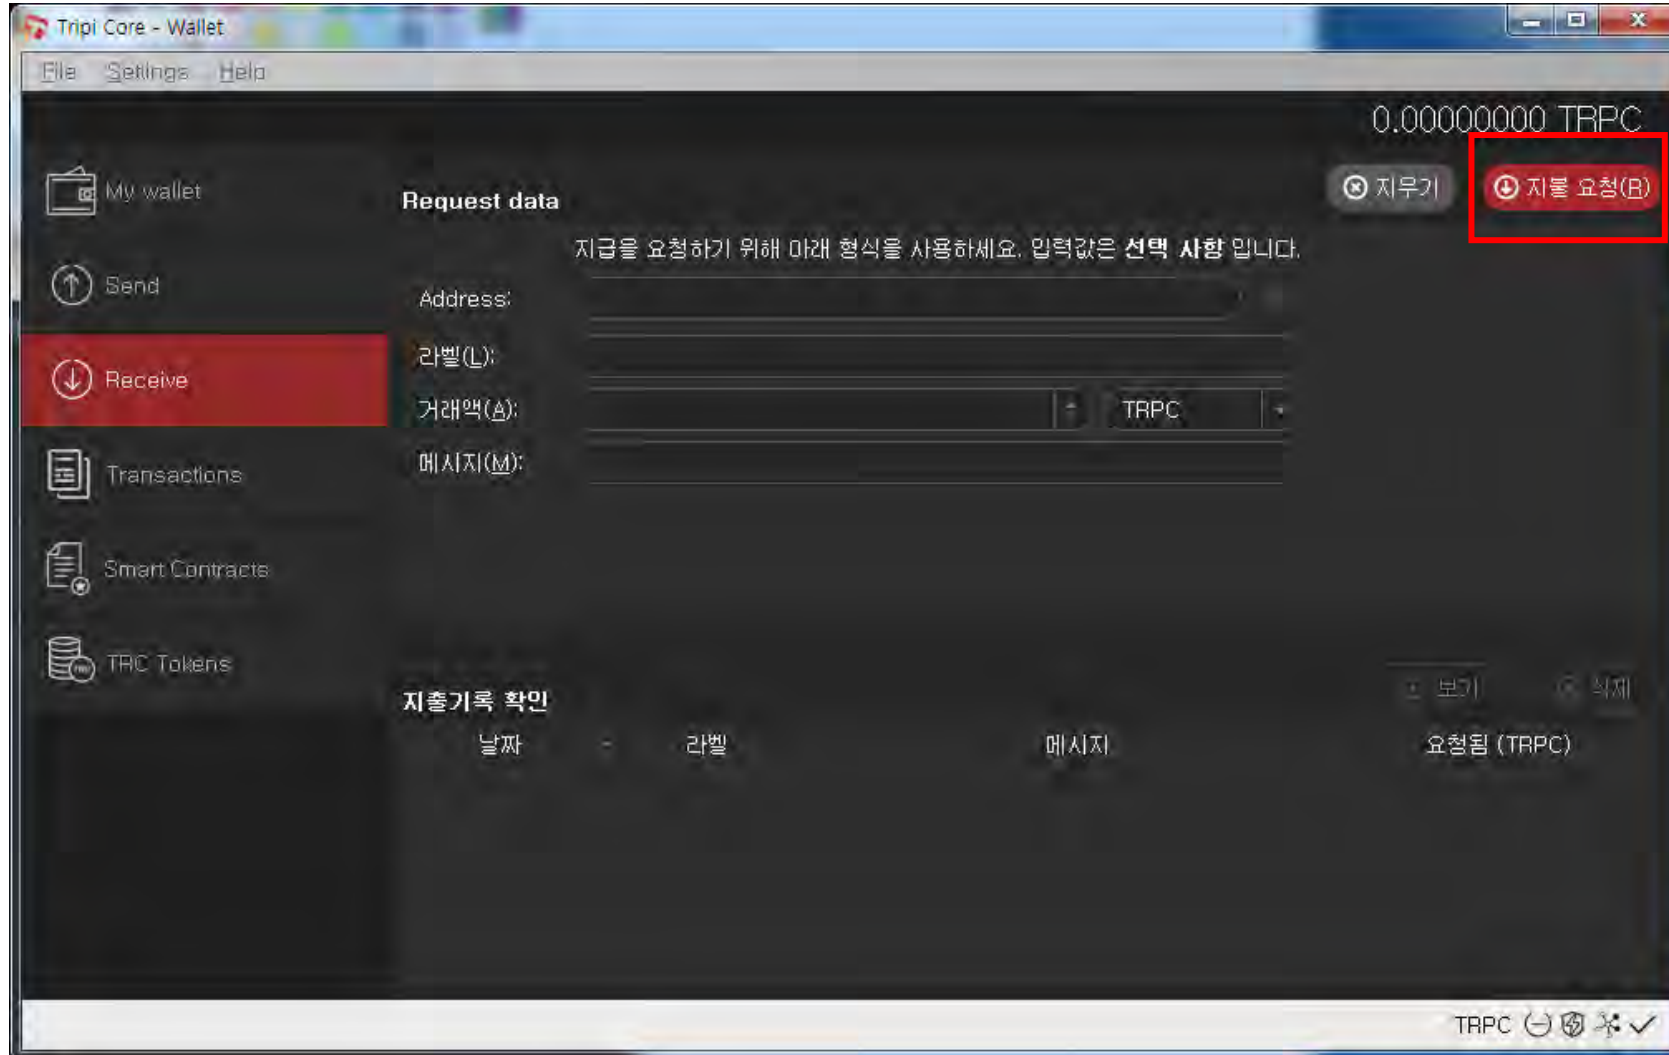

If the lightning turns black, it means that it is normally mined.

Mining Conditions

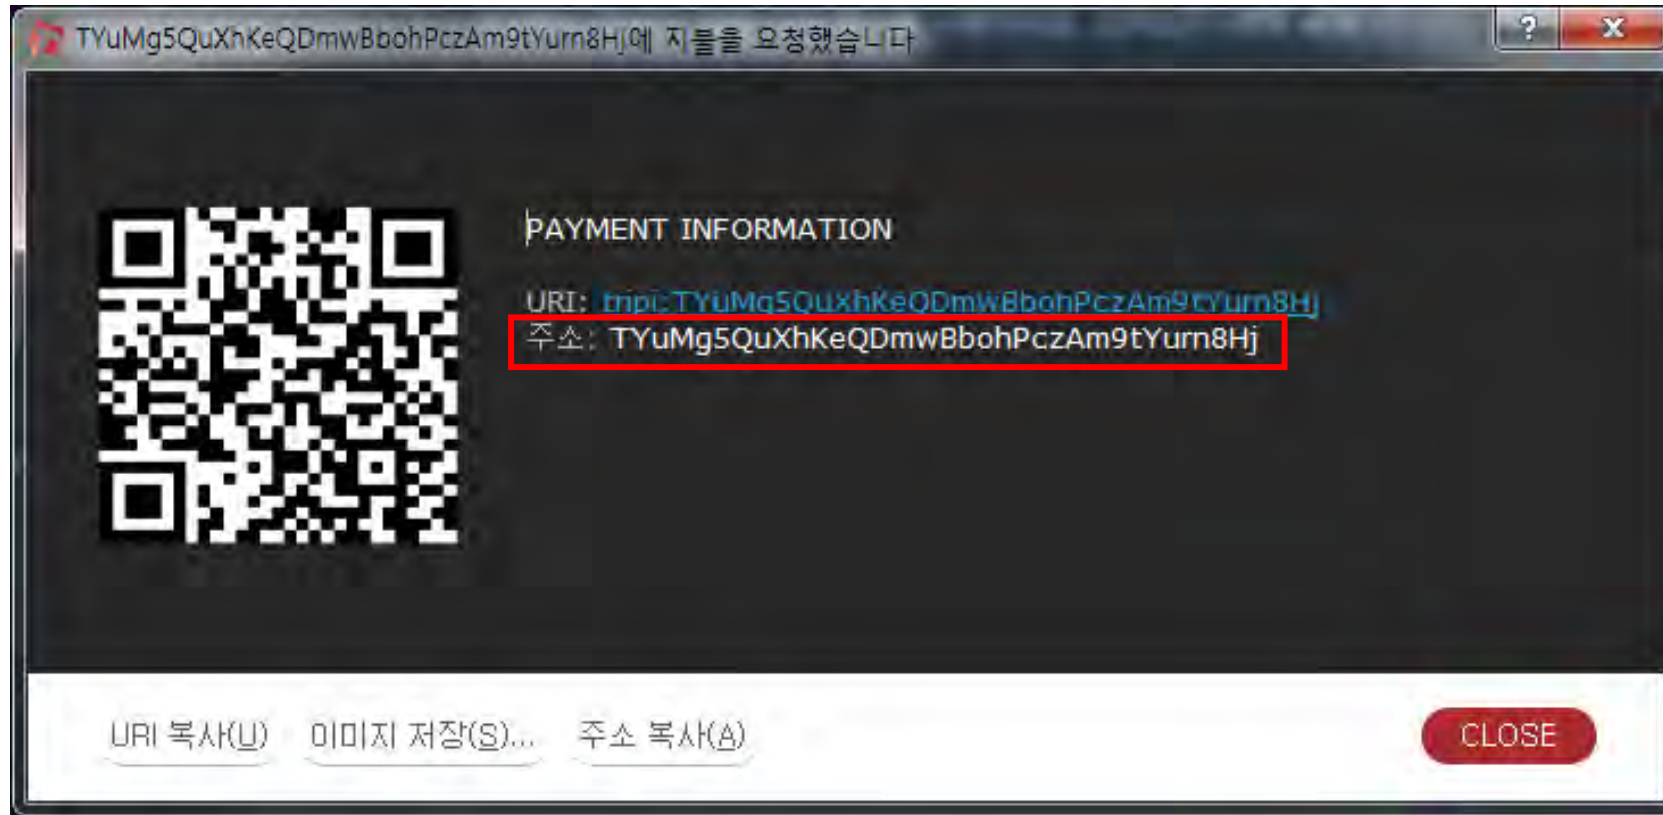

1. Have **more than 1.5 million** Tripi Coins
2. Requires Coin Maturity of 100 blocks (must pass 100 Confirm after final receipt of more than 1.5 million coins)
3. The more coins you have, the more time you're connected to the network, the higher the probability of mining.
4. Mining compensation for one block [628 Tripi Coins + a (transaction fee within the block)]
This will be compensated in five separate cases.
5. Participating in a network does not necessarily result in mining.

03. Create deposit address

1. Click on the payment request button in the upper right hand corner of the wallet

03. Create deposit address

2. Completed creating deposit address

* When sending your wallet address to someone else, please copy the wallet address in the red square.

**Thank
you!**
